

BONUS 1

Vegetarian Diet

Cutting out meat does not mean giving up protein, flavor or fullness. A well-built vegetarian diet is light, cheap and full of fiber — and it can speed up weight loss, as long as you make sure to have a good protein source at every meal. Here you have **20 options**, split evenly between breakfast, lunch, dinner, dessert and drinks.

WHERE THE PROTEIN COMES FROM

- **Eggs** — a complete, very filling protein.
- **Dairy** — plain yogurt, white cheese, ricotta, cottage cheese.
- **Legumes** — beans, lentils, chickpeas and peas.
- **Tofu** — made from soy, full of protein and low in fat.
- **Nuts and seeds** — nuts, walnuts and peanut butter (in moderation).

A golden tip: pair a **legume** with a **grain** in the same meal (rice with beans, chickpeas with rice) and you form a protein as complete as the one from meat.

How to use it: build your day by choosing 1 breakfast, 1 lunch, 1 dinner, 1 dessert and 1 drink from this list. The breakfast, dessert and drink options are already in your book — just look them up by the recipe number. The vegetarian lunches and dinners are the **4 + 4 new recipes** that come next.
