

BONUS 3

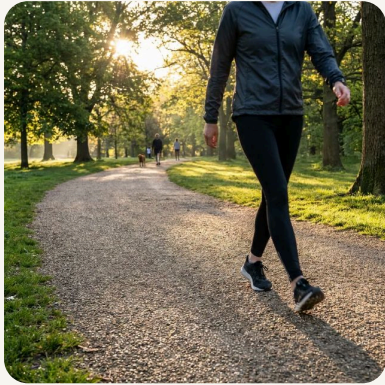

50 Habits and Exercises

The diet does most of the work, but it is exercise that **speeds up the burn**, shapes the body and makes the results last. Here are **30 exercises** that truly help you slim down — on the street, on the treadmill, at the gym or at home, each with a **progression plan** — and **20 habits** that, added together, make the difference.

How to use it: choose a **cardio** exercise (walking, bike, swimming...) and do it **3 to 5 times a week**, following the progression. Add **2 days of strength** (gym or home training) to speed up the metabolism. Adopt the habits little by little — it is the sum of everything that truly slims you down.

WALKING AND RUNNING

The simplest and cheapest way to burn fat — on the street, in the park or on the treadmill.

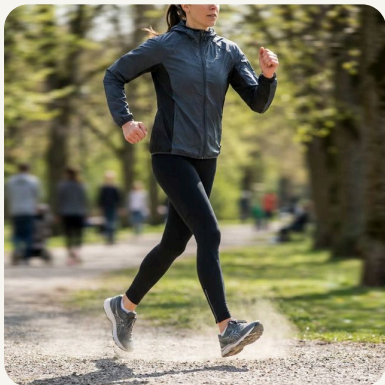

1 Walking

Street, park or treadmill **~150 calories in 30 minutes**

Progression: Week 1-2: 1.2 miles at a comfortable pace, 4 to 5 times a week. · Week 3-4: 2 miles, picking up the pace. · Week 5-6: 2.5 miles, with hills or a 3% incline on the treadmill. · Week 7 and on: 3 miles or 45 minutes at a brisk pace.

Tip: Keep a pace where you can talk, but with effort. On the treadmill, use a slight incline to burn more without running.

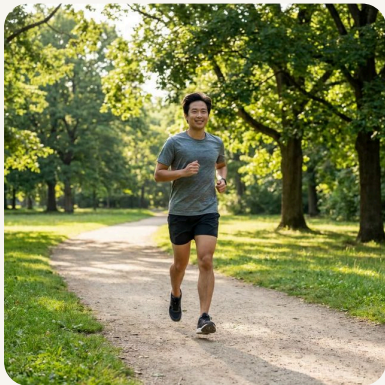

2 Power Walk

Street or treadmill **~200 calories in 30 minutes**

Progression: After you settle into 3 miles, alternate 3 minutes at a brisk pace + 2 minutes normal, for 30 to 40 minutes. Gradually increase the fast stretches.

Tip: Pump your arms bent at 90 degrees and take firm steps. It burns almost like jogging, with no impact on the knees.

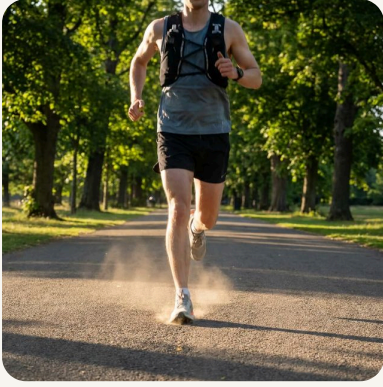

3 Jogging (Walk-Run Method)

Street, park or treadmill **~250 calories in 30 minutes**

Progression: Week 1-2: 1 minute of jogging + 2 minutes of walking, for 20 minutes. · Week 3-4: 2 minutes jog + 1 minute. · Week 5-6: 3 minutes jog + 1 minute. · After that: shorten the breaks until you run continuously.

Tip: Go slow on the jog — if you run out of breath, ease off. That is how the body learns to run without suffering.

4 Continuous Running

Street, park or treadmill

~300 calories in 30 minutes

Progression: When you can run 20 minutes without stopping, add 5 minutes per week until you reach 40–45 minutes. Once a week, do a faster stretch.

Tip: A good pair of shoes makes all the difference for the knees. Run at a pace where you can breathe through your nose most of the time.

EXERCISES

CYCLING

It burns lots of fat and is gentle on the knees — ideal for anyone carrying extra weight.

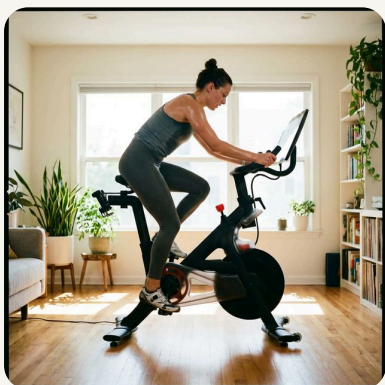

5 Outdoor Bike

Street, bike lane or park **~250 calories in 30 minutes**

Progression: Week 1-2: 20 minutes on flat ground. · Week 3-4: 30 minutes, with small hills. · Week 5 and on: 40 to 60 minutes, varying the pace.

Tip: Adjust the seat: your leg almost straightens at the bottom of the pedal stroke. This protects the knee and lets you ride longer.

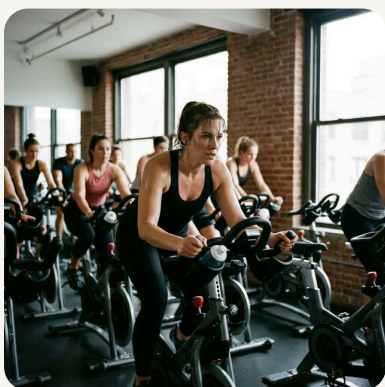

6 Stationary Bike

Home or gym **~250 calories in 30 minutes**

Progression: Week 1-2: 20 minutes at light resistance. · Week 3-4: 30 minutes, increasing the resistance. · After that: 40 minutes alternating 2 minutes hard + 3 minutes easy.

Tip: Perfect for rainy days. Increase the resistance gradually so you are not pedaling 'against nothing'.

7 Spinning

Gym **~350 calories in 30 minutes**

Progression: Start with 1 class a week and build up to 2 or 3. Follow the instructor, but respect your own limit on the resistance.

Tip: One of the classes that burns the most calories. Drink water during it and start with lighter resistance — progress at your own pace.

EXERCISES

SWIMMING AND WATER EXERCISES

The water supports the body's weight, so there is almost no impact — great for anyone with joint pain.

8 Swimming

Pool ~300 calories in 30 minutes

Progression: Week 1-2: swim 20 minutes with breaks at the wall. · Week 3-4: shorten the breaks, reach 30 minutes. · After that: 40 continuous minutes, varying the strokes.

Tip: It works the whole body without overloading the knees and spine. One or two lessons help a lot with your breathing.

9 Water Aerobics

Pool ~200 calories in 30 minutes

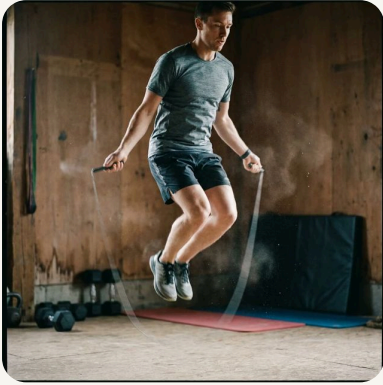

Progression: 1 to 3 classes a week. The intensity rises as you make the movements with more force against the water.

Tip: Done with energy, it burns plenty and strengthens the legs with zero impact. Excellent for people carrying a lot of extra weight.

EXERCISES

INTERVAL TRAINING (FAST BURN)

Little time, big results: it alternates hard effort with short rest. It burns fat during and for hours afterward.

10 Jump Rope

Home, yard or gym **~350 calories in 30 minutes**

Progression: Week 1-2: 30 seconds jumping + 1 minute rest, for 10 minutes. · Week 3-4: 1 minute + 1 minute, for 15 minutes. · After that: 2 minutes + 1 minute, for 20 minutes.

Tip: One of the biggest burns per minute, and a rope is very cheap. Jump low, just enough to clear the rope.

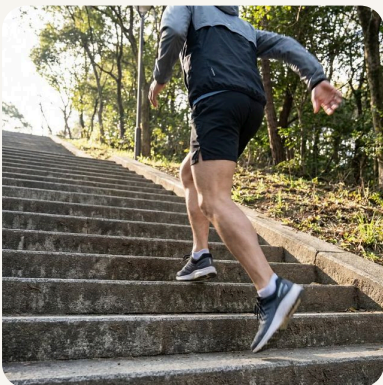

11 HIIT (Tabata)

Home or gym **~350 calories in 30 minutes**

Progression: 4 exercises (jumping jacks, squats, running in place, plank): 20 seconds hard + 10 seconds rest on each, 4 rounds. Start with 10 minutes and reach 20.

Tip: Short and intense. The body keeps burning fat for hours afterward. 2 to 3 times a week already gets results.

12 Climbing Stairs

Building, plaza or stair machine **~300 calories in 30 minutes**

Progression: Week 1-2: go up and down for 5 minutes, rest, repeat 3 times. · After that: blocks of 8 to 10 minutes. Always go down slowly to spare the knee.

Tip: It works the legs and backside hard while burning fat. Use the handrail to go down safely.

13 Jumping Jack

Home or gym ~250 calories in 30 minutes

Progression: Week 1-2: 30 seconds + 30 seconds rest, 8 rounds. · Week 3-4: 45 seconds + 20 seconds. · After that: 1 minute + 20 seconds, 10 rounds.

Tip: Great warm-up and burn at the same time. Open your arms and legs together, at a steady rhythm.

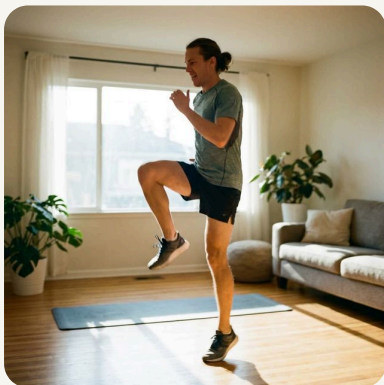

14 Burpee

Home or gym ~350 calories in 30 minutes

Progression: Week 1-2: 5 burpees, rest, 4 rounds (skip the jump if you need to). · After that: 8 to 10 per round, with the jump.

Tip: Squat, plant your hands, kick your legs back, come back and jump. It is intense and works the whole body — go at your own pace.

15 Running in Place (High Knees)

Home ~250 calories in 30 minutes

Progression: Week 1-2: 30 seconds + 30 seconds rest, 8 times. · After that: 1 minute + 30 seconds, 10 times.

Tip: Run in place lifting your knees high. It fits in any little corner, without leaving home.

CLASSES AND DANCE

People who have fun do not quit. They burn lots of fat without feeling like a sacrifice.

16 Dance (Zumba, Rhythms)

Home or gym ~300 calories in 30 minutes

Progression: Start with 20 minutes following videos or a class and reach 45–60 minutes. 3 to 5 times a week.

Tip: It hardly feels like exercise. Pick songs you love and do not stop moving — the sweat comes on its own.

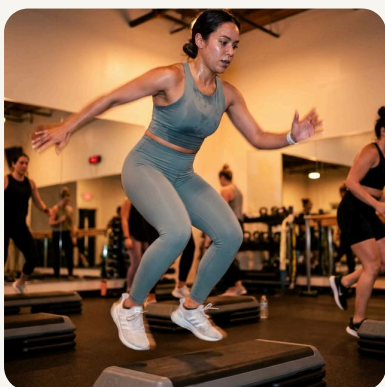

17 Boxing / Muay Thai

Gym or a bag at home ~350 calories in 30 minutes

Progression: 1 class a week up to 3; or 3 rounds of 2 minutes on the bag, adding rounds gradually.

Tip: It releases stress and burns a lot. The technique comes with the classes — you do not need to arrive knowing it.

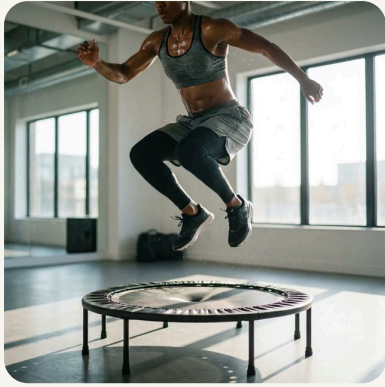

18 Step Class

Gym ~300 calories in 30 minutes

Progression: 1 class a week up to 3, following the choreography on the platform.

Tip: You step up and down from a platform to the beat of the music. It works the legs and stamina hard.

19

Mini Trampoline (Jump)

Gym or home

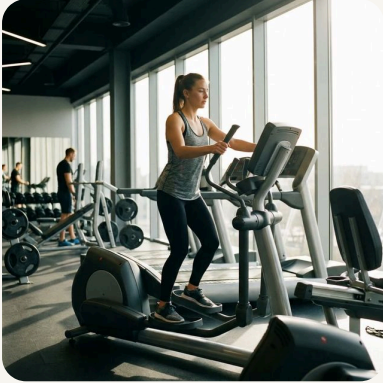

~300 calories in 30 minutes

Progression: Week 1-2: 15 minutes. · After that: 30 to 40 minutes of class.

Tip: Fun and low impact on the joints. Keep your core firm to hold your balance.

GYM CARDIO MACHINES

They burn lots of fat with low impact and let you control resistance, time and intensity.

20 Elliptical (Cross-Trainer)

Gym ~300 calories in 30 minutes

Progression: Week 1-2: 20 minutes at light resistance. · Week 3-4: 30 minutes, raising the resistance. · After that: 40 minutes alternating 2 minutes hard + 3 minutes easy.

Tip: It moves your arms and legs at the same time, with zero impact. Great for anyone whose knees hurt when running.

21 Rowing Machine

Gym ~300 calories in 30 minutes

Progression: Week 1-2: 5 minutes rowing + rest, 3 times. · After that: 20 to 30 continuous minutes, focusing on technique.

Tip: It works almost every muscle at once. The power comes from the legs pushing, not just the arms pulling.

STRENGTH TRAINING AT THE GYM

Muscle burns calories even at rest. Lifting speeds up the metabolism and keeps the skin from sagging.

22 Full Body Workout (Beginner)

Gym ~200 calories in 30 minutes

Progression: 3 times a week, 1 exercise for each area: legs, back, chest, shoulders and belly. 3 sets of 12. Every 2 weeks, add a little weight.

Tip: At first, focus on learning the right movement with light weight. Ask the instructor to set it up and correct you — it prevents injury.

23 Legs and Glutes Workout

Gym ~250 calories in 30 minutes

Progression: 1 to 2 times a week: squat, leg press, leg extension and hip thrust. 3 to 4 sets of 12 to 15.

Tip: The legs are the biggest muscles in the body — training them burns lots of energy and helps you slim down faster.

24 Arms, Back and Chest Workout

Gym ~180 calories in 30 minutes

Progression: 1 to 2 times a week: lat pulldown, row, bench press and shoulder press. 3 sets of 12.

Tip: Strengthening the upper body improves posture and shapes the body while the fat comes off.

EXERCISES

STRENGTH AT HOME (NO EQUIPMENT)

No gym and no weights: your own body is the load. Build a circuit and gain muscle at home.

25 Squat

Home **legs and glutes**

Progression: Week 1-2: 3 sets of 10. · Week 3-4: 3 sets of 15. · After that: hold a heavy object (water jug, backpack) to add load.

Tip: Lower as if sitting in a chair, knees in line with your feet, spine straight. It is the king of leg exercises.

26 Push-Up

Home **chest, arms and core**

Progression: Week 1-2: with your knees on the floor, 3 sets of 8. · Week 3-4: 3 sets of 12. · After that: with your legs straight.

Tip: If it is still hard, rest your hands on a table or wall. What matters is starting from where you can.

27 Lunge

Home **legs and balance**

Progression: Week 1-2: 3 sets of 8 with each leg. · After that: 3 sets of 12, and then holding a weight in your hands.

Tip: Step forward and bend both knees until the back one almost touches the floor. It works one leg at a time.

28 Plank and Crunch

Home **whole belly**

Progression: Hold the plank 20 to 40 seconds, 3 times, and do 3 sets of 15 crunches. (See the Bonus 2 Pilates for more core options.)

Tip: Strengthening the belly makes it firmer and improves posture. Combine it with cardio to see the difference.

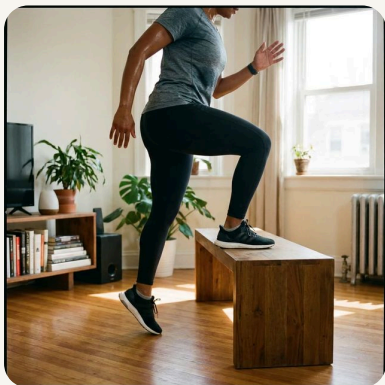

29 Resistance Band

Home **whole body**

Progression: 3 sets of 12 to 15 on each movement (squat, row, curl, leg openers). Switch to a stronger band when it gets easy.

Tip: Cheap and it fits in a suitcase. It replaces the gym weights at home and is great for the arms and back.

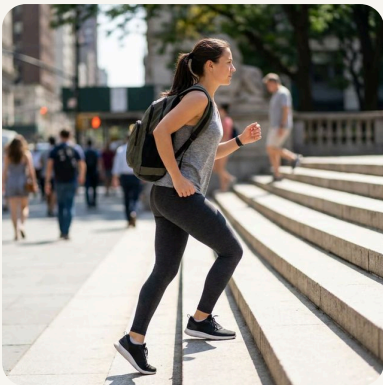

30 Step-Up

Home **legs and glutes**

Progression: Week 1-2: 3 sets of 10 with each leg. · After that: 3 sets of 15, and then holding a weight.

Tip: Step up and down from a sturdy step or chair. It is cardio and strength at once, and works the backside hard.

HABITS

MOVEMENT IN DAILY LIFE

It is not only the workout that burns calories. These habits raise your daily burn all day long, without setting aside time for it.

-
- 31 Aim for 8,000 steps a day.** Use your phone to count. Having a number to hit makes you walk a lot more without noticing.
-
- 32 Take the stairs instead of the elevator.** Small choices like this add up to a lot of energy burned by the end of the day.
-
- 33 Park farther away or get off one stop earlier.** Add steps to your day without having to set aside a special time to walk.
-
- 34 Stand up every hour if you work sitting down.** Sitting still for a long time slows the body down. Stand up, stretch and walk a little.
-
- 35 Walk while you talk on the phone.** Turn still time into moving time, with no extra effort.
-
- 36 Do your housework with energy.** Cleaning, cooking and tidying also burn calories — treat them as movement, not just a chore.

HABITS

FOOD AND PORTIONS

No workout makes up for out-of-control eating. These habits, with the book's recipes, are what truly make the fat come off.

-
- 37 Have protein at every meal.** Egg, chicken, fish, lean meat or beans. It is the nutrient that fills you most and preserves muscle while you lose fat.
-
- 38 Start your plate with salad and vegetables.** They fill your stomach for few calories, so you eat less of the rest without going hungry.
-
- 39 Use smaller plates and serve yourself once.** Decide the portion before you eat. The same food looks like more on a small plate and you feel satisfied with less.
-
- 40 Do not drink your calories.** Soda and boxed juice are pure sugar and do not fill you. Choose water, tea or the book's detox drinks.
-
- 41 Do not eat straight from the package.** Portion it into a bowl. Eating from the package, you lose track and eat far more than you need.
-
- 42 Eat slowly and chew well.** The brain takes about 20 minutes to signal that you are satisfied. Eating fast makes you overeat.
-
- 43 Do not skip meals.** Built-up hunger leads to overeating at the next meal. Eating on schedule prevents losing control.
-
- 44 Keep healthy snacks ready.** Fruit, plain yogurt or a handful of nuts save you from emergency hunger without falling into junk.

HABITS

WATER, SLEEP AND REST

It is during rest that the body transforms. Sleeping poorly and living dehydrated sabotages any diet.

-
- 45 Drink at least 8 glasses of water a day.** The body confuses thirst with hunger. Well hydrated, you snack less and your metabolism works better.
-
- 46 Start the day with a glass of water.** After hours of sleep, the body wakes up dehydrated. Water wakes up the system.
-
- 47 Sleep 7 to 8 hours a night.** Poorly slept nights increase hunger and the sweet craving the next day. Sleeping well also helps you lose weight.
-
- 48 Have a chamomile tea at night (Recipe 147).** It helps you relax and fall asleep, improving rest and appetite control.
-
- 49 Rest at least one day a week.** Muscle grows and the body recovers during rest. Training every day without stopping hurts your results.
-
- 50 Stretch when you wake up and after workouts.** It improves flexibility, prevents soreness and prepares the body to move more during the day.
